

Airport Poly Reversible Snow Plow

*Shown with optional plow markers, rubber deflector

This plow is specifically designed for high speed plowing on airport runways. Choose 16 foot or 22 foot length with 42" or 50" height. The moldboard is formed in 3/8" ultra high molecular weight polymer material offering exceptional performance compared to conventional steel moldboards. Some of the benefits include: lighter than aluminum, yet tougher than steel; proven fuel savings; high resistance to abrasion; completely impervious to corrosion; and a minimization of snow blow-back.

Model	Overall Length of Moldboard	Height of Moldboard	Cutting Path @ 32 degrees	Weight
4216AP	16'	42"	13' 6"	3350 lbs
4219AP	19'	42"	16'	3580 lbs
4222AP	22'	42"	18' 8"	4250 lbs
5020AP	20'	50"	17'	4210 lbs
5022AP	22'	50"	18' 8"	4400 lbs

Standard Features:

- Angling Cylinders (2) - 4" diameter x 28" - two stage
- 2x adjustable casters (360 degree swivel & dual wheel design)
- 4x pneumatic tires (5.70 x 8.0 load range D)

Options:

- Cutting Edges
- Standard or quick tack hitch
- Plow markers
- Rubber deflector
- Hydraulic end gate
