

Quickly transform your snow plow truck into a safe and effective clean-up tool. The Power Broom from Viking Cives is ideal for clearing accumulated grit in rural intersections and tidying up after road construction activities. Simply hook the Power Broom up to your truck's front harness and operate it using the existing plow controls in the comfort and safety of your truck cab.

Standard Features

1. 96" wide
2. 32" diameter rotary broom
3. Bristles are composed of a combination of convoluted poly and wire brushes.
4. Hydraulic direct drive with motors on each end of the broom drum and built in cushion valve.
5. Adjustable heavy duty swivel caster wheels with pneumatic tires
6. Reversible swing allows the broom to angle 15 degrees to the right and the left
7. Standard swivel mount allows for installation onto existing plow harness which is raised and lowered using the plow lift cylinder.
8. Existing plow controls in the cab are used to lift and swivel the broom.

Options

- Rubber material deflector
- Water tank and pump kit, options may vary dependant on the existing truck equipment
- Dust suppression spray bar
- Various swivel adaptor options
